

EXTERIOR JAMB-MOUNT STORM DOORS

The storm doors on this page are made to mount on an extruded jamb, which protrudes 1/2" from the wall.

Note: "Call size" refers to the stud-to-stud rough opening in the wall, not the door itself! For help on determining call size, see page 3.

Doors

STANDARD JAMB-MOUNT STORM DOORS

Oriel / Conventional Storm Door
*White Frame Only
Hardware not included.

For Storm Door Hardware see Page 8.

Shipping Note: Storm Doors must ship by freight unless located within local delivery route area. Please contact us for an exact shipping and handling quote.

◀ A picture of the top outside corner. These storm doors have a built-in drip cap for diversion of water. Also a great place to hide your spare house key!

◀ A picture of the top inside corner. Note the trench inside the lip. This is where the extruded jamb is mounted.

For Installation Items see Page 13.
