

# SPLIT SYSTEM A/C UNITS AND ACCESSORIES

A split system has two parts that are designed to work together- the indoor unit (furnace and a-coil) and an outdoor condensing unit. When the air conditioner is properly matched with a furnace or air handler, the result is maximum efficiency and extended system life.

**\*Important note: For the items on this page, the purchaser must be either a licensed installer or provide an affidavit as proof that they will have a licensed installer on site to install the system.**

**Meets New Federal Mandated High Efficiency Standards- Energy Saving Heat Pump Technology- State of the Art Compressor Technology- Environmentally Friendly R-410A Refrigerant- High Humidity Control Performance- 2 Years Parts Warranty- Positive Seal, Brass Quick Connect Refrigerant Connections- Connection Available in "Sweat Fit" (4.5 and 5 ton units available in sweat fit *only*)- 100% Corrosion Resistant Copper Tube Coils- "Hail Guard" Design is Factory Installed, Offering Increased Weather Durability- Durable Powder Coat Finish- Factory Installed "Hard Start" Ensures Consistent Start-Ups in All Weather**
